

There are more than 1.5 million ATMs throughout the world, providing cardholders with access to their accounts 24 hours a day. And, as banking continues to trend to “self service,” cardholders are expecting more services from ATMs as well as “personalized” settings.

The Advantage Network offers a complete ATM operating and transaction processing system, supporting a wide range of ATM types and functions, from cash dispensers to full-service machines. Advantage also supports dial-up, frame-line, internet, and LAN/WAN connectivity.

The Advantage Network can assist you with all of the decision-making aspects of purchasing, installing, maintaining and operating ATMs – Advantage staff have experience with a number of ATM brands and communication systems and will assist your staff as needed to make the best choices for your institution and cardholders.

On-going support also includes ATM monitoring by Advantage staff as well as participation in the **ATM Management System (AMS)**, an automated fault handling system designed to increase the operational time of your ATM(s), providing greater availability of ATMs on The Advantage Network.

Additional services include Electronic Journaling; web-based monitoring; web-based terminal and transaction data; voice guidance and multi-lingual capability; custom screens; and automated ATM key distribution.

Increase revenue and create opportunities to provide service to your customers with an ATM driven by The Advantage Network.
